February 9, 1993

Dear Developer:

In 1993 Commodore intends to strengthen its position in the CD-ROM market. To achieve this goal, we are investing in new tools (such as ISO. OPT, and SIM which we released in December), new applications, and new hardware.

In connection with these new efforts we are requesting that developers sign the new "Amiga CD" license agreement (see attached). In this way we will have a better knowledge of what is being developed and be in position to update the developers who intend to market commercial titles with any updates, new tools, or product information as they become available.

Please sign and return two original copies of the completed agreement for each product to EJ Mungin.

As we start the new year we are excited about our future product offerings. We are hoping you will be interested in working with us to make 1993 a successful year in CD-ROM developments for both you and Commodore.

Sincerely,

John F Campbell
